Shipping Schedule Management the easy way.

How to use the MVS Shipping Schedules Demo

You have clicked on the 'Enter Demo' hyperlink and have been immediately directed to the main page of the demo. The demo is an exact copy of the Shipping-Schedules.com system. The collapsed menu options are Administrator, Reports, and Schedules. Clicking on one of the options expands the submenu options.

Administrator Submenu:

- Carrier Maintenance – Assign and update carriers, update carrier contacts, assign contacts as superusers, assign carrier access to schedules.
- Customer Maintenance – Update customer and customer billing information.
- SCAC Code Contact Upload – Update carrier contact information by SCAC Code. Create a file and save in .CSV(comma separated value) format. Data sequence should be SCAC code, contact name, address, city, state, zip, phone, fax, email address.
- Schedule Maintenance – Add or change schedule, update header, timeslot, email notification information, deactivate schedule, hide or show deactivated schedules.
- Status Code Maintenance – Add or change Status Codes used when entering check call information.
- User Administration – Add user, change user information, change user access to schedule.

Reports Submenu:

- On Time Performance – Report performance by date range, carrier, scheduled facility, arrival or departure.
- Schedule Report – Report of schedule showing header and timeslots with any scheduled information in spreadsheet form.

Schedules Submenu:

Facilities scheduled – Active schedules will be displayed. The demo begins with one facility. You may add information for any day to the schedule by selecting a date on the next page.

The demo database is refreshed nightly, so any entries you make will remain intact until midnight, each day. So, you may access the demo numerous times during a day and your entries will remain there.

The Help links throughout the system give tutorial information on expected entries. Clicking on the help links expands a new window.
